WORK EXPERIENCE

Unstacked Labs, Kenya
Solutions Architect and Co-Founder

May 2025 – Present

- Engineered and integrated AI features to intelligently match mentees with suitable mentors, successfully connecting over 100 Kenyan women with professionals in the tech industry.
- Architected and developed a movie recommendation application, powered by Google's Gemini AI, to deliver highly personalized and engaging film suggestions by analyzing user preferences and integrating with a robust data set.

Sky.Garden, Kenya
Frontend Engineer and Project Lead

July 2021 – Dec 2024

- Spearheading the redesign of Sky.Garden marketplace, implementing a Design System to enhance user experience and optimize application performance. Achieved a 60% reduction in loading times.
- Enhancing product search indexing efficiency by 30% through modularization, RxJS implementation, and state management optimization.
- Leading the company's technical strategy, advocating for a monorepo architecture to scale product development across multiple markets in Uganda and Tanzania.

Cobiro, Poland
Angular Frontend Developer (Remote)

June 2021 – July 2022

- Developed core features for Cobiro's no-code website builder, empowering over 350,000 users to launch online businesses and leverage integrated Google Ads capabilities.
- Implemented Cobiro's UI Design System, enhancing developer productivity by 50% through consistent UI components and reduced development time.

PROJECT AND RESEARCH

Ashesi D:Lab & MIT D-Lab Financial Inclusion Project, Ashesi University
Project Lead

Jan 2018 – Jan 2019

- Devised 3 prototype fin-tech solutions for mobile money, insurance and savings that enabled the waste pickers gain access to basic financial management resources such as for saving money and affordable medical insurance cover. The waste pickers saw a 50% increase in their savings after training them on how to use the solutions using their mobile phones.

CO-CURRICULAR ACTIVITIES

Google Developers Group - Pwani, Lead

Oct 2022 – Present

- Coordinating and managing developer outreach and support programs initiatives in Kenya's Coastal region, fostering a vibrant community, building strategic partnerships, and driving innovation through Google technologies.

Angular Kenya, Founder and Lead

Oct 2019 – Present

- Empowering the Kenyan developer community by providing high-quality Angular training, fostering a vibrant ecosystem of skilled professionals, through monthly meetups and weekly Angular topic-based webinars.
